

BLUECHIP

KENTUCKY BLUEGRASS

ATTRIBUTES

★'s 5 = Outstanding, 4 = Very Good, 3 = Good, 2 = Moderate, 1 = Poor

★★	Close Mowing	★★★★	Summer Patch
★★★★	Shade Tolerance	★★★★	Dollar Spot
★★★★★	Low Fertility	★★★★★	Leaf Rust
★★	Heat Tolerance	★★★★	Leaf Spot
★★	Turf Density	★★	<i>Poa annua</i>

- **BlueChip** is the affordable Kentucky bluegrass that compliments any Jacklin blend.
- It mixes compatibly with Jacklin Seed's premium *5-steps above*® varieties.
- Sod strength 60% better than Glade in Nebraska sod lifting trials.
- Trusted by turf managers the world over for premium performance, superior consistency.

PERFORMANCE HIGHLIGHTS

FUNGUS FIGHTER: Adding **BlueChip** to your blend provides additional resistance to stem rust, leaf rust, summer patch, melting out, necrotic ring spot, leaf spot, pink and *Microdochium* snow mold, and dollar spot. It also resists seedling damping off, according to university trials.

RESISTS OTHER PESTS: **BlueChip** is nationally ranked in its ability to exclude weeds from the turf by means of competition and not chemicals. It's tops at repelling lawn chinch bug.

CAREFREE LAWNS: **BlueChip** brings quality performance to your lawn, park, or sports field at an affordable price. Its lush green color and plush growth crowds out weeds. **BlueChip** adapts to sports field and home lawn mowing heights, with or without irrigation. In test trials it built up less thatch than other varieties and had reduced vertical growth and clippings (lower plant height).

NOT OVERLY DENSE: **BlueChip** will never overpower your turf with excessive density.

WINTER READY: **BlueChip** tied for #1 in frost tolerance in US/Canadian test trials. It has good coldhardiness and scored strongly in trial locations in the cool-arid region. **BlueChip** provides early spring greening during March and April when other bluegrasses are still sleepy. It retains its color and vigor well into November.

BROAD ADAPTATION: **BlueChip** has been successfully used on some of the top golf courses the world over. You can have confidence **BlueChip** will perform for you.

BLENDS WELL: **BlueChip**'s rich color compliments all Jacklin grasses. Plant it at 2-3 lbs./1000 ft² (10-15 g/m²) with other bluegrasses. Mix it with ryegrass at 80% **BlueChip**, or with tall fescue at 20% **BlueChip**.
